

Interconnecting Member-Operated Generation  
Systems to Cooperative Systems  
Policy No. 321

**I. OBJECTIVE**

To provide for the establishment operating policies applicable to interconnections between the Cooperative's distribution system and member-owned generating systems as necessary to enhance safety, reliability and costs to members and the Cooperative which arise in connection with such interconnections.

**II. POLICY**

The President of the Cooperative is authorized and directed to establish, maintain and update, as deemed necessary, operating procedures setting forth technical specifications and protocols relative to the establishment, operation and maintenance of safe, reliable, and cost-effective methods of interconnection between the Cooperative's distribution system and member-operated generating systems. Such procedures will be effective upon adoption without further board approval, but will be subject to any changes in this policy, and any modifications mandated by future action of the board of directors.

Effective Date: January 1, 2005
